

Senior Operations Manager

Use-Case: Reviews project status

#1 - Morning Check-in

Robert arrives at his desk at 7am and opens the software tool on his computer to start his morning review

Robert logs in to the project management tool.

Aditya Patel

#2 - Dashboard Overview

The dashboard loads showing all active projects, their statuses, and any flagged issues highlighted in red.

He sees a high-level overview of all ongoing projects.

Aditya Patel

#3 - Flagged Issue

Robert notices one project is marked 'At Risk' with a deadline in 2 days. He clicks on it to see details.

A project flagged as 'At Risk' - Robert Investigates.

Aditya Patel

#4 - Drill Down

He opens the project detail page and see which tasks are incomplete and which team member owns each one.

Robert reviews task ownership and progress details.

Aditya Patel

#5 - Send Alert

Robert uses the tool to send an automatic notification to the responsible team member reminding them of the deadline.

He sends a deadline reminder directly through the tool.

Aditya Patel

#6- Status Confirmed

The team member responds and updates the task to 'in Progress'. Robert's dashboard refreshes showing green status.

The issue is resolved - dashboard turns green.

Affinity Diagram

Needs

- quick status checks.
- clear project health.
- ownership visibility.
- fast follow-up actions.

Aditya Patel

Pain Points

- data spread across tools.
- unclear task ownership.
- late risk discovery.
- too many manual reminders.

Aditya Patel

Current Behaviors

- morning dashboard scan.
- drill into red projects.
- message team members directly.
- re-check status later.

Aditya Patel

Misc

- edge cases.
- nice to haves.
- Ideas not yet validated.
- future integration's.

Aditya Patel

Tools & Data

- project status colors.
- deadlines and due dates.
- task owner fields.
- blocker notes.
- update timestamps.

Aditya Patel

Feature Ideas

- auto risk flagging.
- one-click drill down.
- owner based alerts.
- escalation reminders.
- real-time refresh.

Aditya Patel

Outcomes

- fewer missed deadlines.
- faster issue resolution.
- clearer accountability.
- shorter status meetings.
