

Robert Kim

age: 42

residence: Charlotte, NC

education: Bachelor's in Business Administration

occupation: Operations Manager at a mid-size logistics company

marital status: Married, two kids

"If the data isn't telling a clear story, we're wasting everyone's time."

Robert starts his day early reviewing dashboards and team reports. He spends most of his time in meetings, delegating tasks, and making sure projects stay on track. He relies heavily on software tools to keep his team aligned and productive.

Needs

- Real-time data and reporting.
- Easy way to assign and track tasks.
- Role-based access for her team.

Values

- Efficiency and clarity.
- Accountability.
- Reliable, accurate information.

Criteria For Success:

Robert has been in operations management for over 15 years. He starts every morning reviewing project updates, flagging missed milestones, and preparing briefs for leadership. He is not highly technical, but he is very comfortable with intuitive software tools. He strongly believes the right software can make or break a team's performance and is always looking for tools that reduce manual work and give him a clearer picture of operations.

Wants

- Automated summaries sent to her inbox.
- A clean, simple dashboard she doesn't have to dig through.
- Integration with tools her team already uses.

Fears

- Missing a critical deadline due to poor visibility.
- Her team working in silos.
- Adopting a tool that creates more work than it saves.
